DATE MAILED: 04/18/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/657,524

Applicant(s)

MEREDITH, DARYL S.

Examiner

Clark F. Dexter

Art Unit

3724

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 March 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-9 and 17 is/are pending in the application.
- 4a) Of the above claim(s) 2-5 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1,6-9 and 17 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 14 February 2006 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 14, 2006 has been entered.

Drawings

2. The drawings were received on February 14, 2006. These drawings are acceptable.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3724

4. Claims 1 and 6-9 are rejected under 35 U.S.C. 102(b) as being anticipated by European Publication 0 752 300 (hereafter EP '300).

EP '300 discloses a saw (e.g., see Figs. 1-13 and 21) with every structural limitation of the claimed invention including:

a base (e.g., 12) for supporting a workpiece;

a saw assembly (e.g., see col. 6, line 35 - col. 7, line 1) connected to the base, the saw assembly comprising a pivot arm, an upper blade guard (e.g., 18) connected to the pivot arm, a motor (e.g., 20) attached to the upper blade guard, and a blade (e.g., 16) driven by the motor, the saw assembly being movable between an upper position for not engaging the workpiece, and a lower position for engaging the workpiece (e.g., by the pivot located immediately below the motor 20 as viewed in Figure 1); and

a fence assembly attached to the base, the fence assembly comprising a fixed fence fixedly (e.g., 48) attached to the base, a movable fence (e.g., 32, 34; or 60) removably connected to the fixed fence (e.g., as shown in Figure 5), the movable fence defining a first support plane, at least one of the fixed fence and the movable fence for contacting the workpiece, and an auxiliary fence (e.g., 80) disposed behind at least one of the fixed fence and the movable fence, the auxiliary fence defining a second support plane substantially parallel to the first support plane, the auxiliary fence contacting the workpiece when the movable fence is removed (e.g., the auxiliary fence 80 is fully capable of contacting a workpiece when the movable fence 32 is removed; and

Art Unit: 3724

similarly, the auxiliary fence 80 is fully capable of contacting the workpiece when the movable fence 60 is removed).

It is noted that various types of workpieces will meet this claim; for example, an irregular shaped workpiece, a stepped workpiece, a generally L-shaped workpiece or the like, that includes a portion that rests on the workpiece support surface and another portion that extends to contact portion 80. Further, it is noted that component 60 could be pivoted out of the way of the workpiece so that the workpiece may contact surface 80, or it could be removed as suggested in col. 7, lines 31-32. It is emphasized that all of the above-described manipulations, including selection of workpiece configurations, can be performed without modifying the prior art device as disclosed in the prior art document, and thus are considered to be functional recitations of intended use of the prior art device.

Regarding claims 6-9, as disclosed in EP '300, the fixed fence has a support surface (e.g., at 107) that is substantially parallel to an upper surface of the base, is substantially perpendicular to first support plane; and the fixed fence has a surface (e.g., 63) which is substantially coplanar with the first support plane.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3724

6. Claims 1, 6-9 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sato et al., pn 4,869,142 in view of O'Banion et al., pn 5,297,463 or European Publication 0 752 300 (hereafter EP '300).

Sato discloses a saw (e.g., see Fig. 9) with every structural limitation of the claimed invention including:

a base (e.g., 1) for supporting a workpiece;

a saw assembly connected to the base, the saw assembly comprising a pivot arm (e.g., 14), an upper blade guard (e.g., 26) connected to the pivot arm, a motor (e.g., 16) attached to the upper blade guard, and a blade (e.g., 17) driven by the motor, the saw assembly being movable between an upper position for not engaging the workpiece, and a lower position for engaging the workpiece; and

a fence assembly (e.g., 3) attached to the base, the fence assembly comprising a fixed fence fixedly (e.g., 48) attached to the base, the fixed fence contacting the workpiece, and an auxiliary fence (e.g., 37) disposed behind the fixed fence (i.e., when adjusted in such a manner), the auxiliary fence defining a second support plane substantially parallel to the first support plane and contacting the workpiece.

Sato lacks a movable fence. However, such movable fences are old and well known in the art and provide various well known benefits including configuring the fence assembly to correspond to a particular work piece and/or cutting operation. O'Banion et al. discloses one example of such a fence assembly configuration. EP '300 discloses another example of such a fence assembly configuration that clearly shows a movable fence (e.g., 32) that is removable. It is noted that claims 6-9 are met by either Sato or

Art Unit: 3724

Sato modified by the known prior art including O'Banion or EP '300. Therefore, it would have been obvious to one having ordinary skill in the art to provide a movable fence on the fence assembly of Sato (e.g., by replacing fence 3 with a fence assembly such as that disclosed by O'Banion or EP '300) for the well known benefits including those described above.

Regarding claim 17, the distance between the first plane (defined by the movable fence which is the same plane as that defined by the fixed fence) and the second plane (defined by the auxiliary fence) is adjustable and thus is fully capable of being adjusted to the claimed distance.

Response to Arguments

7. Applicant's arguments filed February 14, 2006 have been fully considered but they are not persuasive.

Regarding applicant's argument in the fourth paragraph on page 7 of the response, the Examiner respectfully disagrees with applicant's position and submits that EP '300 does in fact have movable fences (e.g., 32, 34) that are removable. Further, EP '300 also has an auxiliary fence (e.g., 80 attached to 34) that is disposed behind the fixed fence (e.g. 48) and/or the movable fence (e.g., 32) as shown in Figure 6; similarly, EP '300 also has an auxiliary fence (e.g., 80) that is disposed behind the fixed fence (e.g., 48, 63) and/or the movable fence (e.g., 60) as shown in Figure 6.

Regarding applicant's argument in the third paragraph on page 8 of the response, the Examiner respectfully disagrees with applicant's position and submits that

Art Unit: 3724

the auxiliary fence of Sato (e.g., 37) is disclosed as being adjustable (e.g., see col. 5, lines 22-44) and thus is fully capable of being positioned in any desired location (i.e., behind, aligned with, or in front of) with respect to the fixed fence and/or the movable fence.

It is respectfully submitted that the prior art teaches and/or suggests all of the claimed structure and thus the prior art rejection must be maintained.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Clark F. Dexter whose telephone number is (571)272-4505. The examiner can normally be reached on Mondays, Tuesdays, Thursdays and Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Allan N. Shoap can be reached on (571)272-4514. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 3724

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
